**Autonomous Driving** Markus Maurer,J. Christian Gerdes,Barbara Lenz,Hermann Winner,2016-05-21 This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of “autonomous driving.”

**The 'Made in Germany' Champion Brands** Ugesh A. Joseph,2016-03-09 Germany’s economic miracle is a widely-known phenomenon, and the world-leading, innovative products and services associated with German companies are something that others seek to imitate. In The ‘Made in Germany’ Champion Brands, Ugesh A. Joseph provides an extensively researched, insightful look at over 200 of Germany’s best brands to see what they stand for, what has made them

Just as important are the medium-sized and small enterprises, known as the 'Mittelstand'. These innovative and successful enterprises from a wide range of industries and product / service categories are amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on German industrial entrepreneurship and a selection of innovative and emergent stars. All these companies are supported and encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers - the research, industry, trade and standards organizations, the fairs and exhibitions and all the social and cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business; entrepreneurship; branding and marketing; product or service development; international trade and business development policy, will find fascinating insights in this book; while those with an interest in Germany from emerging industrial economies will learn something of the secrets of German success.

**Reading Prehistoric Human Tracks** Andreas Pastoors, Tilman Lenssen-Erz, 2021 This Open Access book explains that after long periods of prehistoric research in which the importance of the archaeological as well as the natural context of rock art has been constantly underestimated, research has now begun to take this context into focus for documentation, analysis, interpretation and understanding. Human footprints are prominent among the long-time under-researched features of the context in caves with rock art. In order to compensate for this neglect an innovative research program has been established several years ago that focuses on the merging of indigenous knowledge and western archaeological science for the benefit of both sides. The book gathers first the methodological diversity in the analysis of human tracks. Here major representatives of anthropological, statistical and traditional approaches feature the multi-layered methods available for the analysis of human tracks. Second it compiles case studies from around the globe of prehistoric human tracks. For the first time, the most important sites which have been found worldwide are published in a single publication. The third focus of this book is on firsthand experiences of researchers with indigenous tracking experts from around the globe, expounding on how archaeological science can benefit from the ancestral knowledge. This book will be of interest to professional archaeologists, graduate students, ecologists, cultural anthropologists and laypeople, especially those focussing on hunting-gathering and pastoralist communities and who appreciate indigenous knowledge.--

*Car Tourism* Waldemar Cudny, 2017-07-05 This book examines the role of cars and the space connected with their production and presentation in tourism development. It describes the role played by experiences and experience societies formed in the 20th c. in the development of contemporary tourism, including tourism related to cars. The book explores the influence of experiencing unusual events, such as car races, car fairs, visits to car industry museums or multifunctional spaces connected with producing and exhibiting cars (e.g. Autostadt or Audi Forum) on the development of a new type of tourism, i.e. car tourism. This kind of tourism is novel in two ways: firstly, it is a new phenomenon in science, as so far it has not been thoroughly studied or described, apart from various short articles. Secondly, this type of tourism has developed on a large scale only in recent years, mainly due to the huge investments made by powerful European car manufacturers (e.g. Autostadt, Audi Forums, Porsche Museum, Lamborghini Museum etc.). The book presents cars and the spaces related to them as tourist assets (sites, events) and as tourist products that satisfy tourists' needs. Moreover, it connects the issue of car tourism to the marketing strategies of large car manufacturers and discusses the theory of tourism space, highlighting the main tourism spaces in which car tourism develops. It presents multifunctional spaces (factories, adventure centres - Autostadt in Wolfsburg), museums, car exhibitions, and race tracks. In the next chapter, following an introduction to the problem of events, the author describes events related to car tourism, including races, rallies, driving schools and car fairs.

The book ends with a summarizing chapter, which includes a model of the function of car tourism as a separate type of tourism, as well as a discussion presenting the main features, advantages and disadvantages of car tourism in the context of the tourism space theory.

**Law in an Era of Smart Technology** Susan Brenner, 2007-12-31 Should law be technologically neutral, or should it evolve as human relationships with technology become more advanced? In *Law in an Era of Smart Technology*, Susan Brenner analyzes the complex and evolving interactions between law and technology and provides a thorough and detailed account of the law in technology at the beginning of the 21st century. Brenner draws upon recent technological advances, evaluating how developing technologies may alter how humans interact with each other and with their environment. She analyzes the development of technology as shifting from one of use to one of interaction, and argues that this interchange needs us to reconceptualize our approach to legal rules, which were originally designed to prevent the misuse of older technologies. As technologies continue to develop over the next several decades, Brenner argues that the laws directed between human and technological relationships should remain neutral. She explains how older technologies rely on human implementation, but new smart technology will be completely automated. This will eventually lead to, as she explains, the

ultimate progression in our relationship with technology: the fusion of human physiology and technology. Law in an Era of Smart Technology provides a detailed, historically-grounded explanation as to why our traditional relationship with technology is evolving and why a corresponding shift in the law is imminent and necessary.

**PESTEL-Analysis of BMW** ,2015-03-27 Seminar paper from the year 2015 in the subject Business economics - Business Management, Corporate Governance, grade: 70 %, Prifysgol Cymru University of Wales, language: English, abstract: Germany is one of the leading car manufacturer industries in the world. The German automotive market convinces customer

preferences around the world with companies like Volkswagen, BMW or Daimler, as confirmed by export rates of 190 billion euro through vehicles and components in 2012 (Frankfurter Allgemeine Zeitung, 2013). The Bavarian automobile manufacturer BMW is one of these highly regarded and venerated automobile brands. The enterprise BMW Group asserts their top position in the premium segment with a new record in global sales of about 2.1 million automobiles in 2014. The additional brand MINI could hold the level of its sales from the previous year and, for the first time, Rolls Royce Motor Cars was able to increase the sales over 4,000 units in 2014, and thus assert the position as the market leader in the absolute luxury segment. Hawranek (2008) and Reithofer, chief executive of BMW, (BMW Group, 2015) emphasize that the company remains faithful to its strategy to continuously hold the position as the world's top seller in the premium class. The elaboration will present an environmental analysis of the BMW Group in the automotive industry with help of the principles of a PESTEL-Analysis. After a general overview of the automotive industry in the 21st century in chapter 2, each point of the PESTEL-analysis will be processed separately in chapter 3. The conclusion in chapter 4 includes the results, an overall assessment of the BMW Group and recommendations considering the focus of the business strategy.

A History of Silicon Valley Piero Scaruffi, 2015-12-11 This book is the first history of Silicon Valley from 1900 to the 2010s. It is a comprehensive study of the greatest creation of wealth in the history of the world, from the establishment of Stanford University to the age of social media. The underlying objective is to find the reason why it was Silicon Valley, and not some place on the East Coast or in Europe, that became the creative technological hub of the 21st century. Silicon Valley did not happen in a vacuum: the book also explores the surrounding social and cultural environment of the Bay Area. This green book follows the red book of 2012, which was the (sold out) first edition coauthored with Arun Rao, and the blue book, which was Arun's proof-edited and expanded second edition of all chapters. The 600-page blue book is still available and contains both my old chapters and Arun's chapters. This 500-page green edition contains only my chapters (basically, the chronology) updated to 2015 and with many additions to early chapters and a new chapter on Asia.
